Pop Not Porn

Inspired by the 70ies porn-soundtracks of Andrew Sherman and Peter Thomas your favorite teacher in history BHL collected boundary points of pop, culture, pop culture and porn. The result is a concept album with a plentitude of possible interpretations. Using typical pop-sounds and pop-structures there are hit singles, eighties references, acapella-techno and (of course) cover versions. The exhibitionism of pop and porn culminates in the last track, where BHL moons.

Big thanks to Stephan and Marion for the cover-shooting.
